MEDIA ADVISORY – MAY 24, 2021

More than 11,200 COVID-19 vaccines provided by Boerne/Kendall County

After more than three months of providing the community the opportunity to receive a COVID-19 vaccine at the Boerne/Kendall County vaccine HUB, the city and county provided its final vaccine last week.

From the first vaccine event on Feb. 12 to our final event on May 19 – thousands of Kendall County residents and fellow Texans funneled through to receive a vaccine in Boerne and Comfort.

By combining our allocations from the state, the city and county provided 5,685 first doses of Moderna, 5,111 second doses and another 446 shots of the Johnson and Johnson vaccine.

We had over 70 volunteers from all sectors assist us in making the vaccine drives as successful as they were.

Anyone still needing the vaccine should contact their primary care physician, the local H-E-B Plus!, Walmart Supercenter, CVS or My Urgent Care Boerne on River Road to schedule appointments.
