

Recommended Large Special Event Parking Layout

General Lake Parking Area Knowledge

- A typical parking space is 10X25 feet
- There is a ditch separating the primary and secondary parking areas. Cars will not make it across this ditch safely. Please drive around.
- This is the optimal method of parking for a large event.
- We HIGHLY recommend a crew of parking attendants to direct cars for optimal parking capacity.
- If the ground is wet due to rain parking lots will remain closed!
- You're welcome to stake off rows if you remove the stakes at the end of the event.
